PROSPECTS AT

Report From New District West of Lida Shows Good Results From Development.

MILL IS READY TO OPERATE

FIRST HOIST FOR DISTRICT REACHES CAMP.

(Special to The Herald.)

Palmetto, Nev., April 27.-Two events of interest marked the close of last week's operations in this district-the arrival of the fittings for the rehabilitation of the Palmetto mill and the discovery of the ledge in the Mauli tunnel, on Burlington mountain, containing values that run into the thousands, presenting a dazzling yellow gleam of gold under the light of the candle. Each of these events marks an epoch in the history of the camp.

The mill will speedily be put in shape to handle a modest tonnage of the free milling ores which have been disclosed process of development work, and which, accumulating on dumps, can soon be made to pay the expense of shaft and tunnel and crosscut through which search is being made for the hidden treasure. And a shipment is to be made from the Mauli tunnel just as soon as two shifts of experienced high-graders can extract the ore, which will tell better than the mere words of man the tale of the riches to be found in these hills. Already several sacks have been filled with the precious rock, and the values are great enough to cause even the case-hardened denizen of Goldfield to sit up and take notice.

Found Vein Had Faulted.

The search for the ledge in this block was prosecuted under conditions that try the stamina of the men who undertake the search for wealth in untried ground, and reflects great credit upon the veteran lessee, George Mauli, and his associates. The tun-

ty feet of backs, will justify the employment of ore teams.

Lida Queen Operations.

Over at the Butler property of the Lida Queen Mining company the hills are alive with enterprising lessees. The main gulch and the ravines which debouch from it are filled with tents, and the sound of exploding dynamite echoes among the pines at all hours of the working day. Every man is bending his energies to opening the ledge in preparation for the custom mill which, unless the plans of the promoters are hindred or delayed by the recent catastrophe at San Francisco, will be erected at Pigeon Springs, four miles based which dashed the require bessemer pig iron. This will help them out, as in the past they have been confined to the bessemer process and therefore obliged to use only bessemer ores; whereas in the open-hearth basic furnaces they can use pig iron made from almost any kind of ore.

"I think, however, that costs will almost any kind of ore.

"I think, however, that costs will almost any kind of ore.

"I think, howev erected at Pigeon Springs, four miles below the mine. Several dumps of this grade of quartz have even now made their appearance, and on the Wilson lease, one of the first to begin operations, more than 200 tons have accumulated, although none has been taken from the workings excepting what was necessary to move in following the rich seam, which is being sacked. This ore, of which several tons is piled up in the mine, is graded close to \$200 a ton, but will probably go through the mill with that of lower grade. The old workings of the mine are idle yet, pending the action of the new board of directors which is to be chosen at the annual meeting of the shareholders at Tonopah tomorrow.

Offer to Build a Mill.

A proposition had been made by California men to erect a mill at the mine in exchange for stock in the company, which was acceptable to the big owners of stock in the company, which was acceptable to the big owners of stock in the company to the plans may be deranged by reason of the calamity which recently befell San Francisco. However, such a delay will prove but temporary, for the history of the state of the product of the product of the produced in the days gone by. Whore went down, Mr. Pollock began about temporary, for the pilother which is the product of the plans may be deranged by reason of the calamity which recently befell San Francisco. However, such a delay will prove but temporary, for the pilother and lying between the Northern light and Chloride Point properties, with their record of having produced several millions, is the Hercules property of S. J. Pollock, one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock one of the camp's old timers. For fourteen years Mr. Pollock began about the produced in the days gone by. More would have been taken out had the mine been properly equippe mulated, although none has been taken from the workings excepting what was

cently befell San Francisco. However, such a delay will prove but temporary, for the riches of the Buster have be come known to other men of means. and the mine's big tonnage will soon be finding an outlet through reduction modern construction. ores have been thoroughly tested and will yield to a very simple and inex-

pensive milling method. Cochran Lease Showing Up.

The Cochran shaft, on the Prout claim of the Buster group, has reached a depth of sixty feet, and the bottom shows ledge matter filled with specks of galena, an infallible sign here of the proximity of an ore body. There are two blocks and a fraction in this lease extending to within 700 feet of the Buster shaft, where the ledge, at a depth of 150 feet, is thirty feet between walls, every ounce of which can be milled at a handsome profit. Because of its location and the conditions which exist in the Buster claim, from whence the ledge can be easily traced by numerous outcrops on the surface, the Cochran lease is considered to offer

and as success there is measured only by one's efforts, it is the natural conclusion that al! will attain it.

COPPER METAL PRODUCTION. Utah Is Beginning to Cut Quite a Figure in the Copper World.

Miscellaneous states and territories As the leading copper companies are now producing the red metal to the limit

now producing the red metal to the limit of their capacity, and much of an increase for the year above the rate for the first three months is not to be expected.

Arizona is likely to make the greatest increase this year, but it will be late in the year before the companies have the enlarged capacity to increase the production. The Old Dominion expects to increase to 5,000,000 pounds per month, and the Bonanza properties will probably increase before the close of the year when the Junction and Calumet & Pittsburg properties enter the producing ranks.

At the rate of increase for the first quarter of the year, maintained for the full year, the three leading copper producing states would have an output of \$51,000,000 pounds, as compared with an actual production of \$00,000,009 pounds in 1905.

A prospective increase of 10.000,000 pounds is all that can be looked for this year from the lake mines.

If the Les fair eventually to be a large producer of copper, but the new production will not be much of a factor until 1897.

In 1967, Nevada is likely to figure in copper production from the Ely camp, but it wil be fully a year before the three big companies in this camp will be prepared to enter the ranks as active pro-

HEADED FOR THE TRUST.

Colorado Fuel & Iron Co. Will Eventually Be Absorbed.

A Boston publication quotes a man who

Mauli, and his associates. The tunnel was driven to open, at a depth of fifty feet, a small ledge that had yielded rich colors in the pan on the surface. It struck a fault, and for a month past two shifts have been continually feeling their way through drift and cross-cut guided by a master mind at the business, and at last the decisive yellow-shot quartz was found in its place of hiding. Slowly and with great care it is being stripped and extracted, the rich streak going into canvas sacks and the rock of less value, which would be high grade in the vicinity of a railroad, adding to the dimensions of a mill dump.

First Holst at Camp.

The first whim to reach camp arrived from Goldfield Friday and is now ready for work. It was installed over the Combination shaft, which was sunk to a depth of fifty feet on the dividing line between the Gillan and Mauli blocks of ground. At this depth a cross-cut to the ledge disclosed a body of mill ore on which considerable stoping has been done in both directions. Satisfied with conditions at the fifty-foot mark, the lessees will devote all their energies to sinking the shaft another fifty feet, where they expect to have a showing which, with fifty feet of backs, will justify the employment of ore teams.

HERCULES OF LION HILL.

Old Property at Ophir Scheduled to Attain Prominence This Year.

On the famous Lion hill in the camp

A letter from Mr. Pollock to a friend A letter from Mr. Pollock to a friend in this city states that the lower tunnel is now in a distance of 492 feet, and that, inside of the next 200 feet, the great ledge in the property will be tapped. He is certain that a mine will result from this work that will attract attention far and wide. Ophir is beginning to step to the front and Mr. Pollock believes that before the present year is over he will be able to add to 2 camp's prestige by opening up the ore of lies developed above in the new lower tunnel of his Hercules in the new lower tunnel of his Hercules

WORKING HOURS AT SMELTERS

American Company's Colorado Plants Inaugurate Eight-hour Service.

Commencing May 1 the five plants of the American Smelting & Refining company in Colorado will be operated on an eight-hour basis so far as furnace men are concerned, says the Denver Mining Reporter. It is announced that the only laborers who will not be affected by this voluntary change on the part of the company will be those whose work is no more onerous or dangerous than is that of the usual day laborer outside of smelting plants.

the Cochran lease is considered to offer possibilities second to none in the camp.

Mr. Cochran is a brother-in-law of W. W. Armstrong of Salt Lake. James and Robert Baird, who mined in Tintic's big bonanzas for several years, also have a good block of ground adjoining the Wilson lease, and are driving a tunnel in to cross-cut a series of east and west veins which show colors in the pan at the surface. There are no drones in the hive at the Buster,

man is not an attractive one. We have often thought that of all classes of smelter laborers whose conditions demanded amelioration, the roaster men had first claim on their employers.

The undesirableness of this class of work is amply shown in the frequent difficulty which the smeiters experience in securing men, and in the abuses practiced by those who do engage in it. We have seen, at change of shifts, many men seeking work who would decline to go on the roasters, preferring idleness or other employment to the arduous work of hand roasting.

Again, as an illustration of the light in which this work is regarded, whenever a careful check' is kept on the work by taking a sample for analysis at the end of each shift, the roaster man whose fertility of brain exceeds his activity of body, will pile up a small amount of ore near the fire box where it will become thoroughly roasted during his shift. If he is so fortunate as to have his sample taken from this pile, and the chances are not against him, he will be able to work with less zeal and yet have a good record. In practically no other department of the smelter is there the temptation to shirk which exists in the roaster house.

BOOSTS FOR BUTTE.

Engineer James W. Neill Cracks Up the West and Butte in Particular.

J. W. Neill, the mining engineer, well known to Boston people by reason of his connection with the United States Mining company, at the time of its promotion, is in Boston, says the Boston News Bureau.

Mr. Neill's office was located in San Francisco, and he is a heavy sufferer by the fire, as practically all his valuable records and reports have been destroyed. Mr. Neill is now the consulting engineer for the East Butte company. He says:

"Mining conditions throughout the

mg engineer for the East Butte company. He says:

"Mining conditions throughout the country were never brighter than they are today. Everybody in the west has money and everybody is a bull on the market. They believe that should the country be blessed with good crops this year, as now indicated, the greatest market in the history of the country will re-

"Butte never was so prosperous as it is today. It is having its first great boom and already over one hundred new mining companies have been organized

but it was be fully a year before the three big companies in this camp will be prepared to enter the ranks as active producers.

It is estimated that Mexico will output this year 150,000,000 pounds of copper, and British Columbia about 50,000,000 pounds. So that it is evident that the p.ochetien of copper from the American continent in 1706 will amount to 1,200,000,000 pounds. The production for 1905 was between 1,-150,000,000 and 1,100,005,600 pounds. in this camp alone.
"The East Butte company gives pron

REVIVAL OF EUREKA.

Famous Nevada Camp Feels Again the Life of Olden Days.

the Life of Olden Days.

Eureka, producer of over \$200,000,000 in silver and gold and once a town of over 10,000 souls, is moving forward again, says the Nevada State Journal. The camp has no boom, but it is gradually adding to its population and business conditions are improving as a result of the revival on Ruby hill, where the large holdings of the Richmond Eureka Mining company, which absorbed the Richmond companies, are located.

Two hundred men are at work retimbering and reopening these celebrated gold producers. On Ruby hill, two and one-half miles from Eureka, the company is building homes for its employes, a spur of the Eureka & Palisade rallway runs to the mines, and within the year the old hill will give employment to treble its present force of workers. All this is a direct sequence of the discoveries of large bodies of salicious ores in southern Nevada.

The United States Smelting company needed Eureka's fluxing ores to handle the southern product and to insure a large and permanent supply it bought the big mines that had lain dormant since the decline of silver. All of these ores will be shipped to the Utah smelters.

BOXING EXHIBITION. At Ogden Monday, April 30.

Special excursion trains via the Rio Grande will leave Salt Lake 6.05 p. m., 7 p. m., 7:15 p. m., returning leave Ogden 11:15 p. m. Big fistic encounter. Corbett vs. Hyland. Other fast preliminary events. Everybody invited.

COOK'S SCIENTIFIC, CERTAIN AND COMPLETE CURE FOR

Weak, Nervous, Restless at Night, and Weak, Aching Back, Diseased Kidneys, Inflamed Prostate, Despondent, Lack of Energy, Ambition and Strength, Poor Memory, Hollowed Eyes,

An endless number of men have one or more of the above symptoms and drag from day to day in despair of a prosperous, happy future, and well they may, for if neglected their health is sure to be wrecked by a complete loss of physical, mental and sexual power.

My method completely and permanently revives manhood after

My scientific, systematic course of treatment for weak, nervous, brokendown youths and men, who have, through folly, dissipation and excesses, unfitted themselves for work and the enjoyment of life is a system that has been tested many times over and proven entirely satisfactory in every case. It is totally different from the many sickening pills and tablets, and the stimulating, stomach-ruining drugs given by would-be specialists. My specific treatment for all the symptoms indicating Failing Manhood is harmless though so effective as to remove them immediately. It is constitutional; therefore, by purifying and enriching the blood, strengthening the nervous system, nourishing the sues, the patient becomes strong and healthy with all signs of trouble forever gone. The treatment is to the human system what the sap is to the tree—it buds energy, ambition and confidence that leaf into a prime, healthy, vigorous feeling of new life.

I treat and cure all such pelvic diseases as PILES, FISTULA, RUPTURE, VARICOCELE, HYDROCELE, BLOOD POISON, SKIN DISEASES, SORES, ULCERS, NERVOUS DECLINE, and diseases of the KIDNEYS, BLADDER AND PROSTATE. My method of treating these diseases has proven so successful that I guarantee a permanent cure in every case accepted, and contract by a written instrument to produce permanent and satisfactory results or refund money.

IMPORTANT .- I will cure you for less money than you can be treated for by any other specialist in Salt Lake. You may have to come to me sooner or later in order to be properly cured; why not before you have lost your money in doctoring with cheap, unskilled specialists?

CURE OR NO CHARGE .- ABSOLUTELY NO CHARGE UNLESS SATISFACTION IS GIVEN. Every patient is given a written guarantee to refund every dollar paid for services if they do not receive a complete, life-long cure and entire satisfaction, and I have made a deposit of \$500.00 in the bank to secure any contract that is not fulfilled.

CONSULTATION FREE, CONFIDENTIAL AND INVITED. A personal thorough and searching examination is required, though if inconvenient to call, write me a full description of your trouble. Office hours, 9 a. m. to 8 p. m., except Sundays, from 9 to 12:30. Address or call

WEAK MEN If you suffer from any of the weak-nesses or diseases caused by ignorance, excess or contagion YOU ARE THE VERY PERSON WE WANT TO TALK TO.

We have proven our skill in curing CHRONIC diseases by publishing many voluntary testimonials from home people, giving names, pictures and addresses.

WE CAN'T PUBLISH OUR CURES IN PRIVATE DISEASES Because it would betray confidence. Hence we have to prove our skill in this class of troubles in another way. This is our plan:

We cure you first and then ask a REASONABLE FEE when you are cured. You can depend upon our word. Thousands of patients have endorsed us. NOW, WE WANT TO CURE YOU with the distinct understanding that we will not demand a FEE until we cure you. This applies to Lost Manhood, Seminal Weakness, Spermatorrhoea, Gonorrhoea, Syphills, Varicocele, Diseases of the Prostate Gland. Unnatural Losses, Contracted Disorders, Stricture, etc., Contagious Blood Poison and all WEAKNESSES of men. of men.

OFFICE HOURS: 9 a. m. to 5 p. m.
